 Sombrero
 - Pointy at top

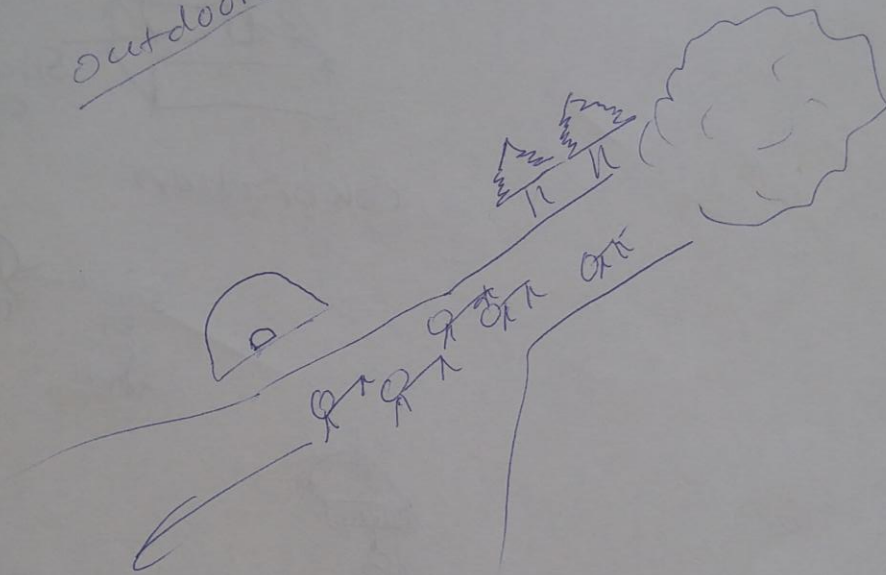

Session ~~long~~ break
 allowed to fun in
 until come back

Interim Summary

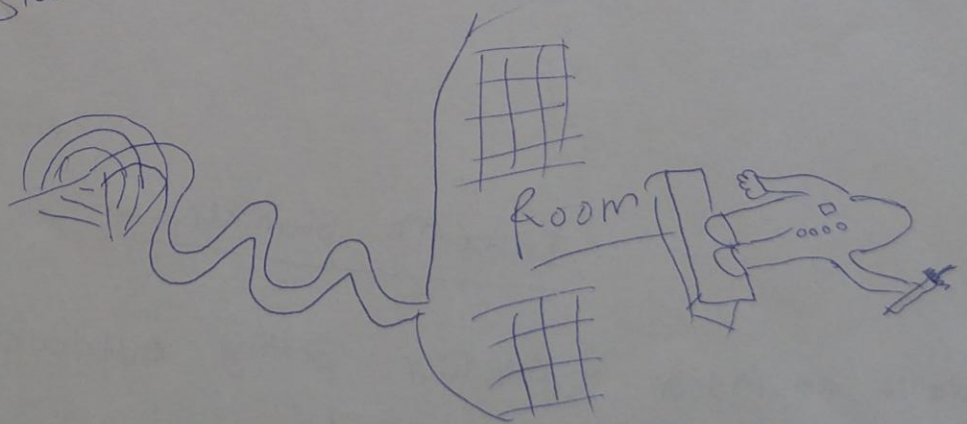

there is an indoor + outdoor setting. outdoors there seem to be movement, coming from ~~the~~ Right to left, people are hiding in passing of that. There is like a Big cloud of dust where the movement is coming from. Seems to be a place people visit. There seems to be animals outside, + a lot of movement, speed.

⑨ there is a structure on the side that has rougher edges and has an opening. The opening goes downwards in a spiral staircase, with very narrow corridors into a room. The room is bigger and has a structure that seems manmade in memorial of something. That structure is holding something, and feels important in representation.

Break Session
3:56 pm

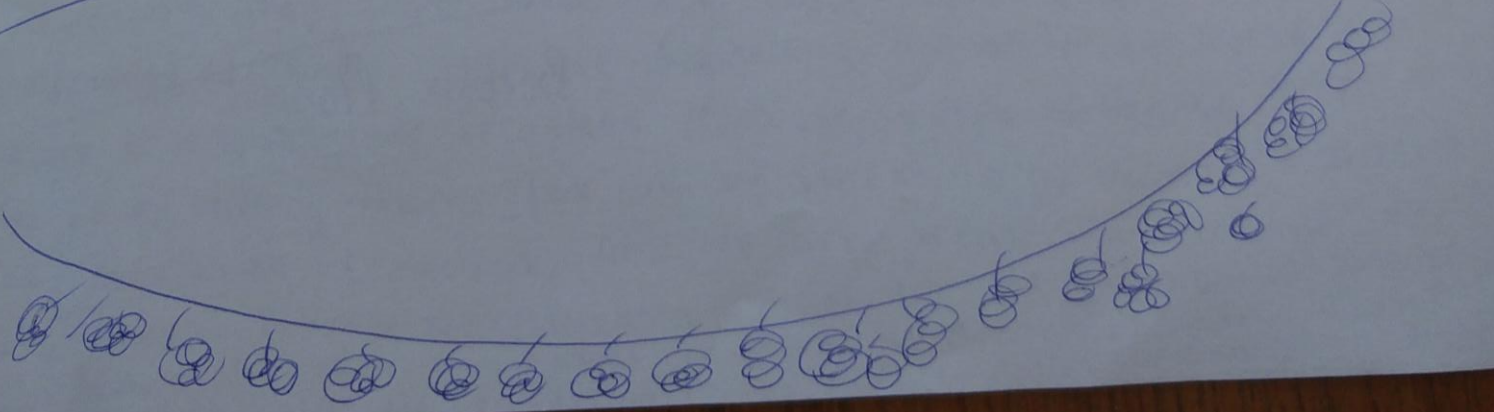

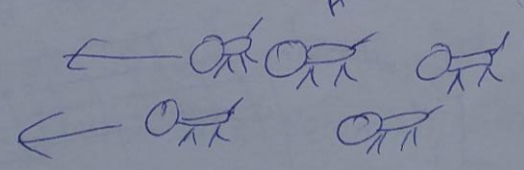

Totally let this go! until Resume.

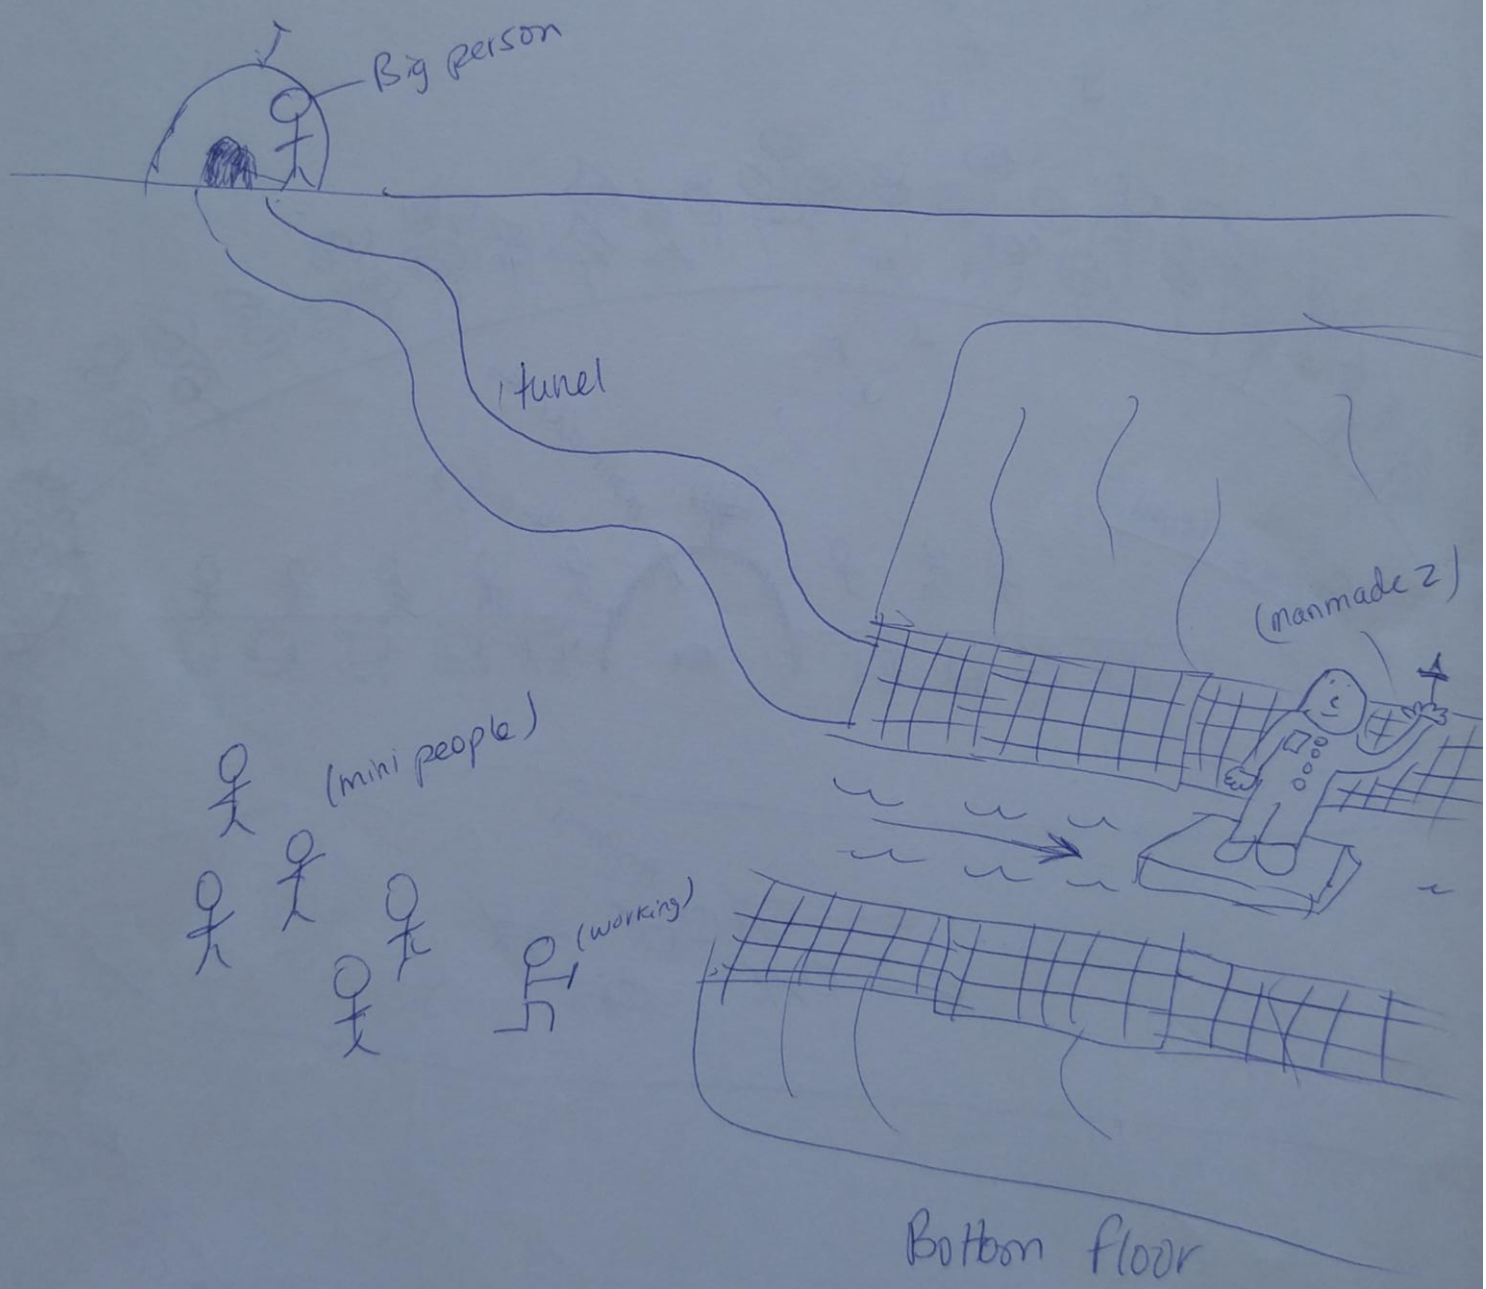

upper level

Ground level

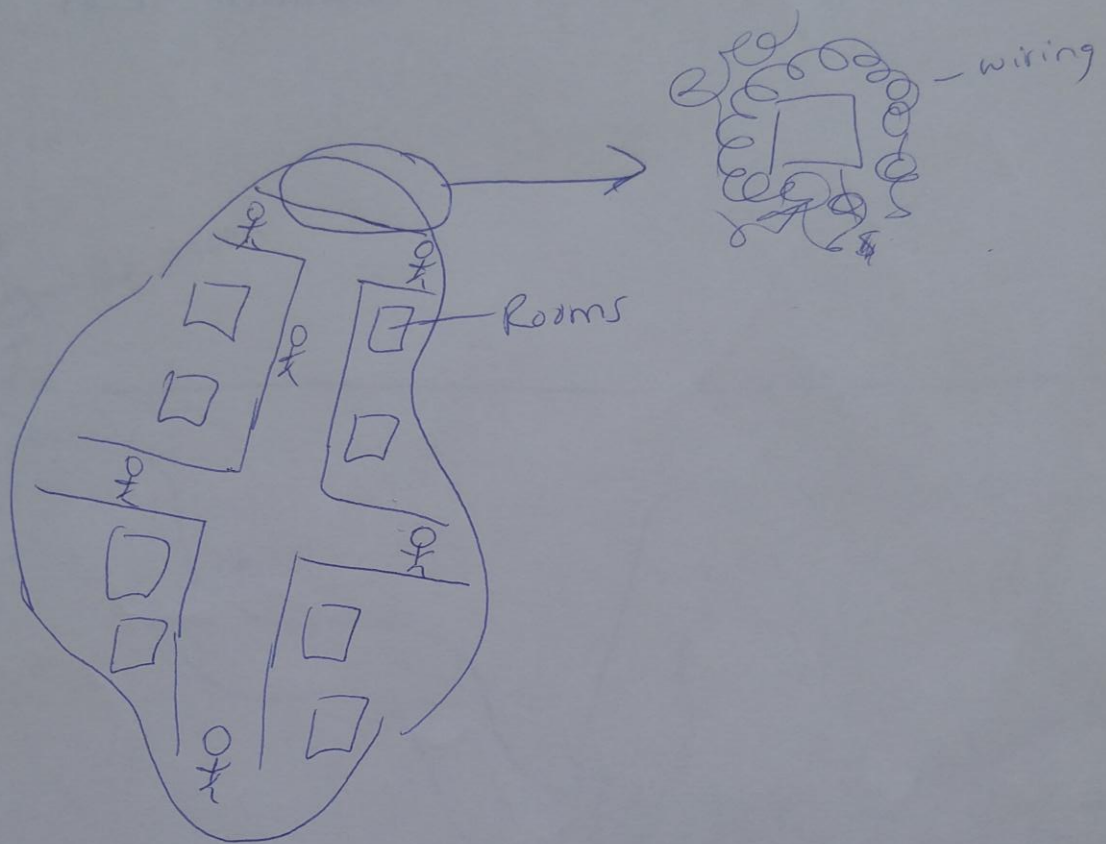

Animals

Inside Space thing

(31)

Summary.

there seems to be 3 levels. The top level, there are people working in a sort of vessel. It is in an enclosed space in the space, they are focussed and task oriented. They are communicating with the ground level. There seems to be a mission involved and asking for directions or guidance. A lot of stress. The ground level has people behind a manmade structure. They seem to be doing hard labour + are controlled by an overpowering leader. They are submitting signals to the space place. There is a manmade structure going down into a tunnel. People seem to be in hiding there. There are animals running away in front of the manmade structure, and the area seems surrounded by a natural setting, no civilisation close by. The environment seems warm and dry. Then the tunnel leads to underground where there is a monument of something important, remembering someone. There

Seems to be a damp, stinky environment and has other people working there. There is a current of shallow water running by and the manmade structure seems to be a focus at the basement level
